1.0 Overview

The purpose of this document is to identify the data elements that are supported and not supported in the MyEducation BC General Data Extracts (GDEs).

1.1 System Considerations

MYEDBC is careful about moving changes to existing GDE's without first giving notice to districts and time to test in the SDTEST environment the change before going to PROD. New GDE's have no impact on existing operations but go through UAT with volunteer districts and then go into SDTEST for other districts to try out before they go into PROD..

2.0 GDE Extracts

The following tables identify the data elements that will be included in each of the General Data Extracts that have been created for MyEducation BC. The 'Supported?' column clearly identifies whether a particular data element is supported or not.

Most GDEs can be found in the:

School View > Student Top Tab > Options > GDEs

Other GDEs can be found in the:

District View > Student Top Tab > Options > GDEs

- Data Elements – Title header from the GDE
- Description – Field in MyEdBC

GDEs can be scheduled to run at specific times as jobs (recommended to run outside of normal business hours 8-4). Instructions on running a scheduled job can be found on the

L1 Information Station under Resources and Recordings > Ministry > 1701 > Running and Scheduling a District 1701 Extract.

3.0 Running and Scheduling a GDE

3.1 Setting Up and Scheduling a Job to Run

In District or School View, go to the Tools top tab > Jobs side tab. Select Options > Add.

Enter the name of the Job you want to run or schedule. In this case: STD 1701.

Select the magnifying glass beside the tool. In the pop up window, Select the proper tool type; in this case Import/Export.

https://lms01.myeducation.gov.bc.ca/asp/jobToolSelect.do - Google Chrome

Select the BC-EXPORT-1701-STD and click OK.

☒	BC-EXPORT-1701-STD	BC 1701 STD Extract	Student
----------------------------------	--------------------	---------------------	---------

Click the SET button beside Input Parameters.

Choose the schools you want to include in your export.

For the DL and CE Active Course Dates, you will want to choose a date that captures the courses with an Active Course Date from when the last DL/CE 1701 was run (February, May, July or September).

Save.

The screenshot shows two browser windows. The left window is titled 'BC 1701 STD Extract' and contains the following fields: School Type (Regular and DL), Select school(s) (search bar), Grades (All Grades), Distributed Learning and Continuing Education (Active Course Date: 5/30/2021), Summer School Options (Students to Include: Funded, Display Designation: No), and a Save button. The right window is titled 'pickList.do' and shows a table of schools with checkboxes. The table has columns 'Name' and 'Type'. The schools listed are Houston Secondary, Muheim Memorial Elementary, Silverthorne Elementary, Smithers Secondary, Telkwa Elementary School, Twain Sullivan Elementary, Walnut Park Elementary, Zz-Bulkeley Valley Learning, Zz-Chandler Park Middle School, and Zz-Northwest Christian Society. All are of type 'Standard'. A 'Select All' button and '23 of 23 selected' indicator are at the top right of the table.

Scheduling the frequency is next in the fields below. If you wish to run it just one time, you can select Run Immediately or select the days and frequency in the appropriate tabs.

Click SAVE.

3.2 Running a Job Now

At any time, you can click into the Details of a job and select Options > Run Now. After the job has run, you can click the Results leaf to view the files.

Note: You can view the progress of any running job by clicking Reports > My job queue.

3.3 Running a Safe Arrival Scheduled Job

The Safe Arrival GDE job is designed for downstream systems/autodialer operations and applies to functionality and usage by the district. Safe Arrival data can be used for attendance reporting processes decided upon by the district. A Scheduled job will automate the extract of data from MYEDBC and transfer it the district's SFTP pick up location.

The GDE SafeArrival.csv creation can be automated through a scheduled job.

- The job should only be run between **8 AM to 9:45 AM, Monday to Friday**.
- The last process pickup from the document storage will be at 10 AM. Any jobs run after 10 AM will be transferred to SFTP server after 5:30 PM. Recommend that Start time on Scheduled job be after 5:40 PM.

The two GDEs that can be automated for this process are:

- GDE – Safe Arrival - Student Daily Absences
- GDE – Safe Arrival - Student Class Absences

Criteria for this scheduled job:

- Tool Type – Import/Export
- Delivery type – File
- Delivery Address box recommendations
 - In order to have the script for this process transfer the output file to the sFTP server, the filename specified in the delivery address needs to follow this naming pattern:
 - School level class attendance: 1234567C_SafeArrival.csv (replace 1234567 with the school number)
 - School level daily attendance: 1234567D_SafeArrival.csv (replace 1234567 with the school number)
 - District level class attendance: 12C_SafeArrival.csv (replace 12 with the district number)

- District level daily attendance: 12D_SafeArrival.csv (replace 12 with the district number)
- For example:
 - 7199299C_SafeArrival.csv (For Class attendance where 7199299 is the school id) if running at the school level
 - 7199299D_SafeArrival.csv (For Daily attendance where 7199299 is the school id) if running at the school level
 - 71C_SafeArrival.csv (For Class attendance where 71 is the district id) if running at the district level
 - 71D_SafeArrival.csv (For Daily attendance where 71 is the district id) if running at the district level
- Start Time
 - The job can only be run between **8 AM to 9:45 AM, Monday to Friday**

The screenshot displays the 'Safe Arrival Job' configuration page in the MyEducationBC system. The page is titled 'A D Rundle Middle School 2023-2024' and includes a navigation bar with tabs for Pages, School, Student, Staff, Attendance, Conduct, Grades, Assessment, Schedule, Extracurriculars, Global, Tools, and Admin. The 'Tools' tab is selected, and the 'Safe Arrival Job' is listed under 'Entered Jobs'. The configuration form includes the following fields:

- Name:** Safe Arrival Job
- Tool:** Import/Export Definition : Student Daily Absences for Safe Arrival
- Input parameters:** Set
- Input defaults:** ☐
- Enabled:** ☐
- Delivery type:** File
- Delivery address:** 03333033_SafeArrival.csv
- Start time:** 9:20 AM
- End time:** (empty)
- Repeat time (minutes):** 0
- Save multiple results:** ☐
- Run immediately:** ☒
- Start date:** (empty)

Buttons for 'Save' and 'Cancel' are located at the top and bottom of the form.
